in 1450 all europe s books were handcopied and amounted to only a few thousand by

1500 they were printed and numbered in their millions the invention of one man johann gutenber had caused a revolution printing by movable type was a discovery waiting to happen born in 1400 in mainz germany gutenber struggled against a background of plague and religious upheaval to bring his remarkable invention to light his story is full of paradox his ambition was to reunite all christendom but his invention shattered it he aimed to make a fortune but was cruelly denied the fruits of his life s work yet history remembers him as a visionary his discovery marks the beginning of the modern world

one of the most puzzling lapses in accounts of the rise of the west following the decline of the roman empire is the casual way historians have dealt with gutenber s invention of printing the cultural achievements that followed the fifteenth century when the west moved from relative backwardness to remarkable robust cultural achievement would have been impossible without gutenber s gift and its subsequent widespread adoption across most of the world richard abel follows the radical cultural impact of the printing revolution from the eighth century to the renaissance addressing the viability of the new christian classical culture although this culture proved too fragile to endure those who salvaged it managed to preserve elements of the classical substance together with the bible and all the writings of the church fathers the cultural upsurge of the renaissance fourteenth to seventeenth centuries which resulted in part from gutenber s invention is a major focus of this book abel aims to delineate how the cultural revolution was shaped by the invention of printing he evaluates its impact on the rapid reorientation and acceleration of the cultural evolution in the west this book provides insight into the history of the printed word the roots of modern day mass book production and the promise of the electronic revolution it is an essential work in the history of ideas

the study of new media opens up some of the most fascinating issues in contemporary culture bringing together key readings on new media what it is where it came from how it affects our lives and how it is managed it encourages readers to pay attention to the new in new media as well as consider it as a historical phenomenon

major transformations in society are always accompanied by parallel transformations in systems of social communication what we call the media in this book historian frédéric barbier provides an important new economic political and social analysis of the first great media revolution in the west gutenber s invention of

the printing press in the mid fifteenth century in great detail and with a wealth of historical evidence barbier charts the developments in manuscript culture in the twelfth and thirteenth centuries and shows how the steadily increasing need for written documents initiated the processes of change which culminated with gutenberg the fifteenth century is presented as the age of start ups when investment and research into technologies that were new at the time including the printing press flourished tracing the developments through the sixteenth century barbier analyses the principal features of this first media revolution the growth of technology the organization of the modern literary sector the development of surveillance and censorship and the invention of the process of mediatization he offers a rich variety of examples from cities all over europe as well as looking at the evolution of print media in china and korea this insightful re interpretation of the gutenberg revolution also looks beyond the specific historical context to draw connections between the advent of print in the rhine valley paper valley and our own modern digital revolution it will be of great interest to students and scholars of early modern history of literature and the media and will appeal to anyone interested in what remains one of the greatest cultural revolutions of all time

as an interdisciplinary field computational linguistics has its sources in several areas of science each with its own goals methods and historical background thereby it has remained unclear which components fit together and which do not this suggests three possible approaches to designing a computational linguistics textbook the first approach proceeds from one s own school of thought usually determined of study rather than by a well informed delib by chance such as one s initial place erate choice the goal is to extend the inherited theoretical framework or method to as many aspects of language analysis as possible as a consequence the issue of compatibility with other approaches in the field need not be addressed and one s assumptions are questioned at best in connection with puzzling problems the second approach takes the viewpoint of an objective observer and aims to survey the field as completely as possible however the large number of different schools methods and tasks necessitates a subjective selection furthermore the pre sumed neutrality provides no incentive to investigate the compatibility between the elements selected the third approach aims at solving a comprehensive functional task with the differ to arrive at the desired solution suitability ent approaches being ordered relative to it and compatibility of the different elements adopted must be investigated with regard to the task at hand

we live in a digital media society in which pictures are becoming more and more important so human communication is increasingly becoming a visual communication that is not a new finding but the new question is what does this development mean for the law up to now the law is the part of the society which is most sceptical towards images law has still resisted the visual temptation this will not last for ever the rush of pictures in everyday life and in every part of the society is much too strong and it is even getting stronger the invasion of images will change the character of modern law deeply modern law will become a pictorial law what are the chances and the risks of pictorial law and visual law communication this is the topic of the book

from typefounding through typesetting to the printing process itself this narrative offers a fresh look at the unprecedented success story of the spread of the black art right across europe in a mere 40 years stephan füssel here analyses the first early printings placing them in the context of the history of communication and the intellectual climate of a europe wide educated elite by about 1500 he foregrounds the tremendous rise in european culture and the history of education experienced as a direct result of this media revolution in separate chapters füssel depicts the fast spreading of the art of printing to italy france and england at the same time highlighting the importance of the art of printing for the roman catholic church the reformation the university and the economy from herbals to a guide for midwives the present book shows popular instruction at work in the vernacular as well as the consolidation of knowledge into encyclopedias in the early modern period and the emergence of new forms of the prose novel and the beginnings of newspapers and periodicals finally stephan füssel traces the modern resonances of gutenbergs invention which persisted in virtually unchanged form for a further 350 years it underwent decisive technological change through industrialisation and mechanisation in the nineteenth century and again through digitalisation at the close of the twentieth century however as füssel shows the mass diffusion of information and the related communications revolution which began with gutenbergs continue unabated

in the mid 1910s the golden age of chinese capitalism began accompanied by a technological transformation that included the drastic expansion of china's gutenbergs revolution this title finds the origins of that revolution and analyses their subsequent development in the republican era

gutenberg simply put helped found the modern age

this book is an introduction to the life and work of johannes gutenberg the man who invented the printing press gutenberg has been called the man of the millennium by time life magazine and others in the mid 15th century he developed the first practical system for making movable type his invention allowed books to be mass produced for the first time in history this book contains a wealth of information about gutenberg and his invention it has many fascinating photographs and illustrations including a simplified schematic that shows how gutenberg made his movable metal type today we take books for granted but before gutenberg s printing press books were a luxury only the wealthy could afford gutenberg s invention changed our world forever the ability to reproduce books efficiently and economically launched humanity into a new age of information education and enlightenment for the masses this is the story of a remarkable man and his magnificent machine

what does obscene mean what does it have to say about the means through which meaning is produced and received in literary artistic and more broadly social acts of representation and interaction early modern france and europe faced these questions not only in regard to the political religious and artistic reformations for which the renaissance stands but also in light of the reconfiguration of its mediasphere in the wake of the invention of the printing press the politics of obscenity brings together researchers from europe and the united states in offering scholars of early modern europe a detailed understanding of the implications and the impact of obscene representations in their relationship to the gutenberg revolution which came to define western modernity

over 50 collected essays introduce some of the major social controversies about the computerization of society they point out the social processes which drive and shape computerization and identify the resulting paradoxes and ironies
